PERSONAL PROJECTS

Present

UAE RPA from BOQ Automation

- Implemented a streamlined automation process for a UAE client, facilitating the generation of customer-specific BOQs. This included automated download and consolidation of supporting and main DU's data and BOQ documents from portals, incorporated project, coordinates, amount details and approver information. Achieved efficiency gains by reducing processing time to approximately 8 to 10 minutes for 10 DU-IDs. Successfully uploaded BOQs on portals and optimized data transmission to the database. Received positive appraisals from frontline stakeholders in the UAE upon the successful completion of this project.

Present

Live Network Monitoring Dashboard RPA

- Implemented a live network data monitoring system with RPA, providing real-time notifications for rollback, late completion, and late starts by product. Automated reporting includes low and high fatal errors, status updates, and violation details via email.

Present

Service Release & Drafting Tool

- Designed a customized Service Release and Drafting Tool for Ethiopia, automating data gathering from portals and expediting link and DU-ID generation by site type. This initiative substantially reduced processing time from 1 hour to an impressive 3 minutes, contributing to enhanced operational efficiency and timely project delivery.

Present

HomeChef Food Ordering System

- Developed a PHP-based online ordering system empowering home chefs to showcase and sell their culinary creations, featuring personalized profiles and seamless order management. This project supports home-based culinary entrepreneurs while providing a convenient experience for customers.
